## About us

**Tropics Solar Solutions Pvt Ltd**, established by a team of seasoned engineers and industry professionals renowned for their expertise in executing large-scale and diverse solar projects, stands as a leader in the renewable energy sector. Specializing in **end-to-end Engineering, Procurement, and Construction (EPC) services**, our company offers comprehensive solutions including consultative sales, system design, equipment procurement, project management, solar panel installation, and ongoing support for maintenance and warranty claims.

With a track record of successfully delivering **500+ projects**, we are poised to expand our footprint into European markets, leveraging our commitment to excellence and innovation. Our dedicated workforce comprises highly skilled individuals with extensive experience in the solar energy domain, ensuring the highest standards of service delivery and customer satisfaction.

Aligned with our core values of environmental sustainability, we focus on reducing carbon emissions, mitigating air pollution, enhancing energy efficiency, and promoting clean energy solutions. Collaborating closely with clients, suppliers, and stakeholders, we strive to continuously improve environmental performance and contribute to a greener future.

At Tropics Solar Solutions, we are committed to delivering projects on time, with uncompromising quality and significant cost benefits. By consistently exceeding client expectations and fostering a culture of innovation, we ensure optimal returns on investment while adhering to fair business practices. As proud supporters of the "**Make in India**" campaign, we stand as an ideal partner for driving local manufacturing and sustainable development initiatives.

We are an ideal partner to support "Make in India" campaign initiative and we also support our customer in availing Government schemes' benefits like **PM Suryoday Yojana, PM KUSUM**, etc.

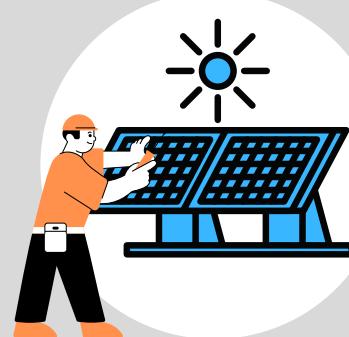

**HIGH QUALITY SERVICES**

**TRAINED & TRUSTED PROFESSIONAL**

**24\*7 SUPPORT**

## Vision and Mission

---

### Vision

"Empowering a sustainable future through affordable and innovative solar solutions, lighting the path towards renewable energy independence for generations to come."

### Mission

At Tropics Solar Solutions, our mission is to revolutionize the way the world harnesses energy by providing accessible, reliable, and sustainable solar solutions. Through cutting-edge technology and unwavering commitment to environmental stewardship, we aim to empower individuals, businesses, and communities to embrace renewable energy and reduce their carbon footprint. With a focus on quality, efficiency, affordability, and customer satisfaction, we strive to be a trusted partner in advancing the global transition to clean, renewable power sources.

## Benefits of adopting solar energy

- Solar System Reduces Your Electricity Bills by 80-85%
- Solar System has low maintenance costs
- Solar system installations are supported by Government through various incentives and subsidies helping customers to reduce initial cost greatly
- Solar systems work in a variety of climates
- The installation of solar energy systems enhances the value of your property
- Solar power serves as an eco-friendly and enduring energy solution

## Services provided by us

We provide our customers with cost-effective, high quality energy solutions. Our team is dedicated to providing you the most value for money by cutting down your power bills as much as possible without compromising on performance!

Sustainable, Reliable & Affordable Energy...

### 1) Engineering, Procurement, Installation and Commissioning for

- Residential properties
- Commercial and Industrial sector

#### **-Residential properties:**

Installing solar system on a residential sector can help reduce your power bills by up to 80% with an average return on investment (RoI) of 2-4 years. Our range of solar system options are designed and optimised with Tier-1 panels to ensure you will only get the best quality systems for your home, ensuring the right choice to reduce your bills.

Tropics solar solutions will analyse your bills and usage to make sure you acquire the best solution for your home with the best products and savings.

#### **-Commercial and Industrial Solar Installations:**

Many businesses are choosing to source a portion or all of their electricity through solar energy. Saving money on operating expenses through reduced energy charges is one of the key reasons to install solar for commercial/ Industrial use.

### 2) Project management consultancy for various type of client's

### 3) Solar PV Module Maintenance

- Regular maintenance of solar array (Solar modules connected in series), is to keep the surface (glass) dust free.
- Regular inspection and checks of the solar module ensure performance efficiency at optimal levels

### 4) We do provide financing options (collateral free) for all type of projects through private financer.

We provide you Sustainable Future of Energy. We are committed to provide the best solar solutions. We started this company with a vision and determination of energy sustainable planet and future. We serve in residential and commercial areas with unbeatable prices for solar system leveraging our wide experience in solar industry.

## Rooftop Installations:

Rooftops of small houses are best suited for the installation of small solar power system in the free space available. In general electrical load in domestic use are for running appliances like Fans, Air Conditioning systems (ACs), refrigerators, lights, televisions, etc.

Industries, IT Parks & Malls can install Solar power to get the potential benefits of Solar System and get ease from heavy tariffs.

Solar system requires minimum maintenance; regular cleaning of modules can keep the system up and running.

## Off-Grid & Grid Tied Installations:

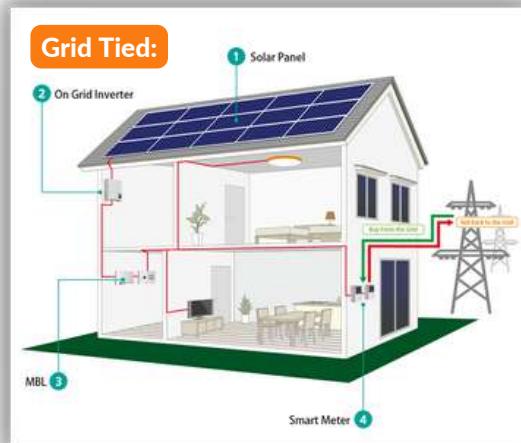

### Off Grid solar solution

Works best in the places where there is no electricity available or there is erratic power supply.

### Grid-Tie / On Grid solar solution

Works best in the places where there are no power cuts or where Diesel Generator sets are used in the absence of grid supply.

## Projects delivered

COMMISSIONED ROOF-TOP (MAHARASHTRA)		
01	<b>400 KWp, Pune, Grid-connected, with Net-metering</b> Owner: Proto-D Engineering Pvt.Ltd	Turn-key
02	<b>300 KWp, Nanded, Grid-connected</b> Owner: Commercial Mall	Turn-key
